

Break Tanks/Bulk Water Storage

Liquimech Break Tanks & Bulk Water Storage Tanks are skid mounted for fast deployment and set up. These units are perfect for civil, mining, and metropolitan projects where space is at a premium or rapid set up and mobility is required.

The low tare means that our units can be moved with smaller cranes into position, making them a highly versatile option for quickly deployable, plug and play static water storage.

Break Tanks

- Fitted with Stair & Gantry System as Per AS1657
- Options from 10KL – 60KL
- Drain Valves
